To: Niagara Waste Systems Customers

**TO ALL OUR CUSTOMERS IN AND/OR SERVICING THE HEALTH-CARE
INDUSTRY:**

**RE: AGREEMENT FOR THE ACCEPTANCE OF WASTE FROM MEDICAL
INSTITUTIONS**

As a facility that services or engages in medical/health care related activities (i.e. hospitals, clinics, doctor offices, dentist offices, nursing homes, prisons, government laboratories etc.), it is important that you are aware the Niagara Waste Systems Landfills do not accept:

- Biomedical waste
- Cytotoxic waste
- Treated biomedical waste
- Any material with a biomedical, biohazardous, or cytotoxic symbol on it regardless of their content

Any loads containing unacceptable material will be returned or disposed of at an appropriate location at your expense.

Please review the Ministry of the Environment's guideline C-4 and ensure that the waste materials that you handle or offer for disposal strictly comply with these guidelines and are classified as solid, non-hazardous waste according to the C-4 guidelines as well as Regulation 347.

Please ensure your employees and customers are aware of these requirements. We ask that you complete the attached agreement. All customers in or servicing the health-care industry (medical institutions/health-care facilities) MUST have prior written approval to dispose of their waste at NWSL. **Please have your drivers notify the scalehouse operator if they are transporting wastes that are generated from one of the medical or health care facilities identified above.**

Thank you,

Scott Hurley
